Georgian – Native

English – Fluent

German – Fluent

EXPERIENCE

Frontend Developer

[NexTbil Tech](#) – Tbilisi, Georgia - Hybrid

2025 Sep - Present

- Developed and maintained multiple high-traffic Next.js websites, translating Figma designs into responsive, production-ready UI.
- Modernized legacy platforms by migrating several PHP-based domains to a scalable, performant Next.js architecture.

Fullstack Developer

[dataPad GmbH](#) – Vienna, Austria - remote

2025 Aug - Present

- Developed full-stack features for a large Meteor.js-based document digitization platform, supporting both web and mobile users.
- Built and maintained REST API endpoints for the React Native app, enabling document upload, form filling, and sync functionality.
- Implemented customer-facing features using React Hook Form and MUI, and contributed to backend logic and MongoDB workflows.

Frontend Developer

[Bitasmbi](#) – Tbilisi, Georgia - contract

2025 Feb - 2025 Aug

- Built the UI for an AI-powered recruitment platform, enabling developers to showcase projects and match with recruiters.
- Converted complex Figma designs into responsive, modern React components and pages.
- Created reusable UI components and improved overall frontend consistency.

Frontend Developer

[BlitzSports](#) – Tbilisi, Georgia - remote

2023 Feb - 2024 Jan

- Built and maintained the Next.js frontend for a sports news platform.
- Styled all pages using Tailwind CSS and optimized for performance and accessibility.
- Developed a full-featured backoffice for editors: rich-text editor integration, content publishing tools, and dashboard UI.

SELECTED PROJECTS

Bakken & Bæck studio: <https://bakkenbaeck.vercel.app/>

- Bakken & Bæck is a design and technology studio. I have created its modern design, smooth animations, and responsive layout. It serves as a showcase of front-end development skills and UI/UX attention to detail.

Book a Real Estate: <https://real-estate-2dmj.onrender.com/>

- Collected and structured dataset with more than 15+ real estate properties to show the functions of the website. The authentication is done with JWT through http-only cookies. User manages reservations and more.

Setanta Sports Landing: <https://set-clone.vercel.app/>

- This is sport streaming platform, which has very beautiful ui design. I have spontaneously built the landing page and tried to make it as similar as possible.

Ecommerce: <https://ecommerce-ig4w.onrender.com/>

- This is an ecommerce front end website with beautiful animation. It fetches data with react query from Neon DB. The backend is build with node/express.
